# BUILD A MODEL OF THE LEGENDARY DARTH VADER!

Everyone knows Darth Vader, the most famous villain in the *Star Wars* galaxy. Now is the chance to build the formidable Sith Lord at an unprecedented scale, complete with all the character's details!

Considered by some to be the Chosen One who would bring balance to the Force, Anakin Skywalker succumbed to Darth Sidious and fell to the dark side. As Darth Vader, he faced his former master, Obi-Wan Kenobi, on the volcanic planet Mustafar, where he suffered grave wounds to most of his body.

The only way to keep him alive was to rebuild him using cybernetic parts and encasing him in sinister black armor, which served as his life support system. The Sith Lord, as the galaxy would come to know him; was born.
