

The 'Bus', the History of a Legend

Discover the whole Bus history from the early prototypes.

The Transporter – or 'Bus', as it is popularly known – was designed based on the sketch by a Dutch car importer, who in 1947 visited the Volkswagen factory in Wolfsburg and was enthralled by a vehicle with a small cabin, platform and rear engine that transported parts within the factory. The scene inspired him and, one year later, he presented the project. That's how the Volkswagen Transporter was born, and it enjoyed immediate success because it developed into a vehicle capable of carrying goods, families or travelers throughout the world. Its reliable air-cooled engine, based on the Beetle's, was a key element that made the Bus an international bestseller.

Over the years,

the Bus evolved into different generations, which, although gradually modernizing the concept, maintained the original spirit of a versatile vehicle suited to all.

Explore the Bus world... you'll be surprised!

Discover all the Bus special models.

Now you can assemble your own Volkswagen Transporter

in its 23-window Samba Bus version, and with its unmistakable and famous two-tone paint. A great opportunity to own this precious collectors' piece at home by building this wonderful 1:8 scale reproduction of the original Samba Bus step by step.

Build the Volkswagen Samba Bus model step by step

Build this accurate replica of the Samba which, with its 23 windows and sunroof, is undoubtedly the most

BODY

Luggage rack
An essential accessory
for long trips to carry
everything you need.

Ladder
A practical way to reach the luggage rack and properly secure the suitcases.

SCALE 1:8 METAL

held at the AutoMuseum Volkswagen in Wolfsburg.

Doors
All the model's moving parts, The seat upholstery features the textures and colors of the original model. The finishings of the door panels, the interior of the body and the dashboard are identical such as the doors, are mounted on metal hinges, ensuring reliable fastening and perfect fit. to those of the actual vehicle.

The wheels are made of a metal rim and a realistic tire, reproducing not only the tread design but even the sidewall markings.

The sunroof, so characteristic of this model, is made of fabric that perfectly reproduces the original canvas and folds in the same way.

Windows
The side windows work just like the originals, sliding open and closed, making the model highly realistic.

Body
The body is made of metal, which gives the model an excellent finish and strength, as well as great realism.*

*Except the roof, which is made in plastic due to the windows and the sunroof holes.
